

**Generation Resource Mix**

A comparison between the sources of generation used to produce this product and the historic regional average supply mix.

**Environmental Characteristics**

A description of the characteristics associated with each possible generation resource.

<b>Biomass Power</b>	<b>Air Emissions and Solid Waste</b>
<b>Coal Power</b>	<b>Air Emissions and Solid Waste</b>
<b>Hydro Power</b>	<b>Wildlife Impacts</b>
<b>Natural Gas Power</b>	<b>Air Emissions and Solid Waste</b>
<b>Nuclear Power</b>	<b>Radioactive Waste</b>
<b>Oil Power</b>	<b>Air Emissions and Solid Waste</b>
<b>Other Sources</b>	<b>Unknown Impacts</b>
<b>Solar Power</b>	<b>No Significant Impacts</b>
<b>Unknown Purchased Resources</b>	<b>Unknown Impacts</b>
<b>Wind Power</b>	<b>Wildlife Impacts</b>

**Air Emissions**

A comparison between the air emissions related to this product and the regional average air emissions.

**Radioactive Waste**

Radioactive waste associated with the product.

Type:	Quantity:	
High-Level Radioactive Waste	Unknown	Lbs./1,000 kWh
Low-Level Radioactive Waste	Unknown	Ft <sup>3</sup> /1,000 kWh

Starion purchases all of its electric energy from the wholesale market. The above generation resource mix is based on PJM EIS reporting of regional generation sources. Starion Energy does not have access to information regarding the radioactive waste produced by nuclear generation in this region.

With in-depth analysis, the environmental characteristics of any form of electric generation will reveal benefits as well as costs. For further information, contact Starion Energy at [www.starionenergy.com](http://www.starionenergy.com) or by telephone at 800-600-3040.
